

In the claims:

Please amend the claims as follows:

1-21. (Cancelled)

22. (New) A method for creating entries in an on-line database including a user-defined category and an associated description comprising:

receiving a request from a user to create an entry in an on-line database;

creating an entry in the on-line database;

receiving a category defined by said user for said entry and a description of said category; and

associating said entry with said category.

23. (New) The method of claim 22, wherein said entry includes non-textual content.

24. (New) The method of claim 23, wherein said non-textual content comprise graphics.

25. (New) The method of claim 22, further comprising the act of allowing said user to index said selected entry in said on-line database with at least one user-defined keyword.

26. (New) The method of claim 22, further comprising the act of allowing said user to add a URL to said entry in said on-line database.

27. (New) The method of claim 22, further comprising the act of allowing said user to add a hyperlink to said entry in said on-line database.

28. (New) An apparatus for creating entries in an on-line database including a user-defined category and an associated description comprising:

means for receiving a request from a user to create an entry in an on-line database;

means for creating an entry in the on-line database;

means for receiving a category defined by said user for said entry and a description of said category; and

means for associating said entry with said category.

29. (New) The apparatus of claim 28, wherein said entry includes non-textual content.

30. (New) The apparatus of claim 29, wherein said non-textual content comprise graphics.

31. (New) The apparatus of claim 28, further comprising means for allowing said user to index said selected entry in said on-line database with at least one user-defined keyword.

32. (New) The apparatus of claim 28, further comprising means for allowing said user to add a URL to said entry in said on-line database.

33. (New) The apparatus of claim 28, further comprising means for allowing said user to add a hyperlink to said entry in said on-line database.

34. (New) A web server for creating entries in an on-line database including a user-defined category and an associated description comprising:

a web server and an associated database, the web server including an HTML front-ending process configured to:

receive a request from a user to create an entry in the database;

create an entry in said database;

receive a category defined by said user for said entry and a description of said category; and

associate said entry with said category.

35. (New) The web server of claim 34, wherein said entry includes non-textual content.

36. (New) The web server of claim 35, wherein said non-textual content comprise graphics.

37. (New) The web server of claim 34, further configured to allow said user to index said selected entry in said on-line database with at least one user-defined keyword.

38. (New) The web server of claim 34, further configured to allow said user to add a URL to said entry in said on-line database.

39. (New) The web server of claim 34, further configured to allow said user to add a hyperlink to said entry in said on-line database.
